

ENVIRONMENTAL POLICY

Kerman serves industry, principally in the mining, chemical, industrial process and commercial building sectors.

The Company's management and personnel as a group are fully aware of the importance of environmental issues that confront industry today.

It is with this awareness that Kerman management, employees and subcontractors are committed to a common goal of imposing zero harm to the environment.

This will be achieved through the implementation of the following:

- Compliance with all relevant Statutory Regulations that maybe applicable to each project.
- Compliance with all relevant client environmental regulations.
- Ensuring environmental issues are identified and control mechanisms are in place.
- Undertake regular inspections to ensure set standards are being adhered to.
- Promote environmental awareness to Kerman personnel and Subcontractors through instruction and training programs.
- Ensuring that that Environment Management Plans are up to date, monitored and periodically reviewed to determine its effectiveness and compliance to Project Regulations.
- Continually servicing and conducting pre-start checks on all vehicles and equipment to minimise risk of air and ground pollution.
- Ensure that responsibilities for environmental management are communicated and clearly understood by all management, employees and subcontractors.
- Communicate openly with employees and subcontractors on environmental issues whilst encouraging their contribution to improving Kerman environmental standards.
