

FERTILISER STORAGE FACILITY
KWINANA, WA

CLIENT:
WHITFORD
FERTILISERS

PROJECT VALUE:
\$4.0M

DURATION:
SEPT 2004 -
MAR 2005

Design and construction of a 50,000 tonne bulk fertiliser storage building including all roadways and services.

This building utilises high grade materials due to the corrosive environment. The building consists of a series of product bunkers using 6m high concrete retaining walls cast on site.
