

NO 2 STORAGE FACILITIES
KWINANA, WA

CLIENT:
WESFARMERS
CSBP LIMITED

PROJECT VALUE:
\$8.1M

DURATION:
1998 -
1999

Design and construction of a 70,000 tonne capacity fertiliser storage facility at CSBP's Kwinana works.

This facility consisted on a 250m long and 55m wide storage building with five fixed and five moveable compartments.

The facility also included 1,000T import conveyor feeding the full length of the new storage with connection to existing facilities.

Extensive use of corrosive resistance materials were utilised throughout the construction, including stainless steel cladding, timber purlins and girts and high spec painting and concrete treatments.
