

MASONRY BLOCK PLANT
MIDDLE SWAN, WA

CLIENT:
MIDLAND BRICK
COMPANY

PROJECT VALUE:
\$9.2M

DURATION:
DEC 2008 –
JULY 2010

Design and construction of a process building for the manufacture of concrete paving blocks.

This project included detail design, fabrication and erection of the main process building, materials in-load building and associated switchrooms and transformer compounds. These buildings incorporated concrete pits and a large insulated curing chamber. KCL also provided labour, supervision and equipment to install mechanical items in the in-load, raw products and mixer plant areas.
